

iPoint Newsletter : November 2010

System overview, new modules & client update

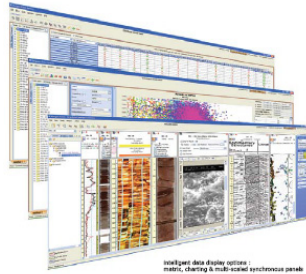

System Overview : What is iPoint?

The iPoint system provides true co-visualization and mining of all wellbore data types, irrespective of location, format & scale.

"Turkey Shoots" & "Bake Offs"

Recent major client success stories have seen iPoint selected over other industry offerings as the preferred data storage & visualization system for core data, geochemistry, PVT and other conventionally complex data types (see 'Client Update').

This data can then be fully integrated with corporate well data via our middleware plug-in solutions (see 'Plug-in Spotlight')

[Visualization Modules >>](#)

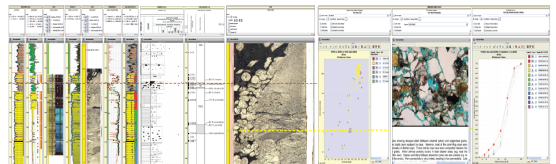

[Admin Modules >>](#)

Module Spotlight : vizPoint

The vizPoint module offers unique depth-based integration capabilities whether the data is log, raster or sample based.

The 'SyncScroll' mechanism allows the user to integrate multi-scaled data types for a 'macro-to-micro' co-visualization experience. (This includes full support of all **Raster, SIF and LIC** formats for easy access to all your SmartSection and Petra depth referenced images as well as complex sample analysis).

The canvas display can support large single well composites or multi-well panels.

Plug-in Spotlight : OpenSpirit

"You Ain't Seen Nothin' Yet....."

We are delighted to announce our new release where **iPoint** has recently taken OpenSpirit enablement to a whole new level when **dynamically** integrating multiple data stores in the same depth view, canvas, data matrix or cross-plot.

The **iPOS** (iPoint-OpenSpirit) plug-in allows data from sources such as **OpenWorks, Recall, Geolog, Petrel & Techlog** to be fully integrated alongside native iPoint data such as **Core Images, Rel Perm, Capillary Pressure, Petrography & Geochemistry**.

Client Update

Perigon are delighted to welcome the following clients who have recently chosen **iPoint** over other offerings:

ConocoPhillips
ENI
Marathon Oil
Nexen

These can now be added to our rapidly growing portfolio & join the likes of **BP, Shell, Total & Chevron** among others
